

# Inertia™ GOVB

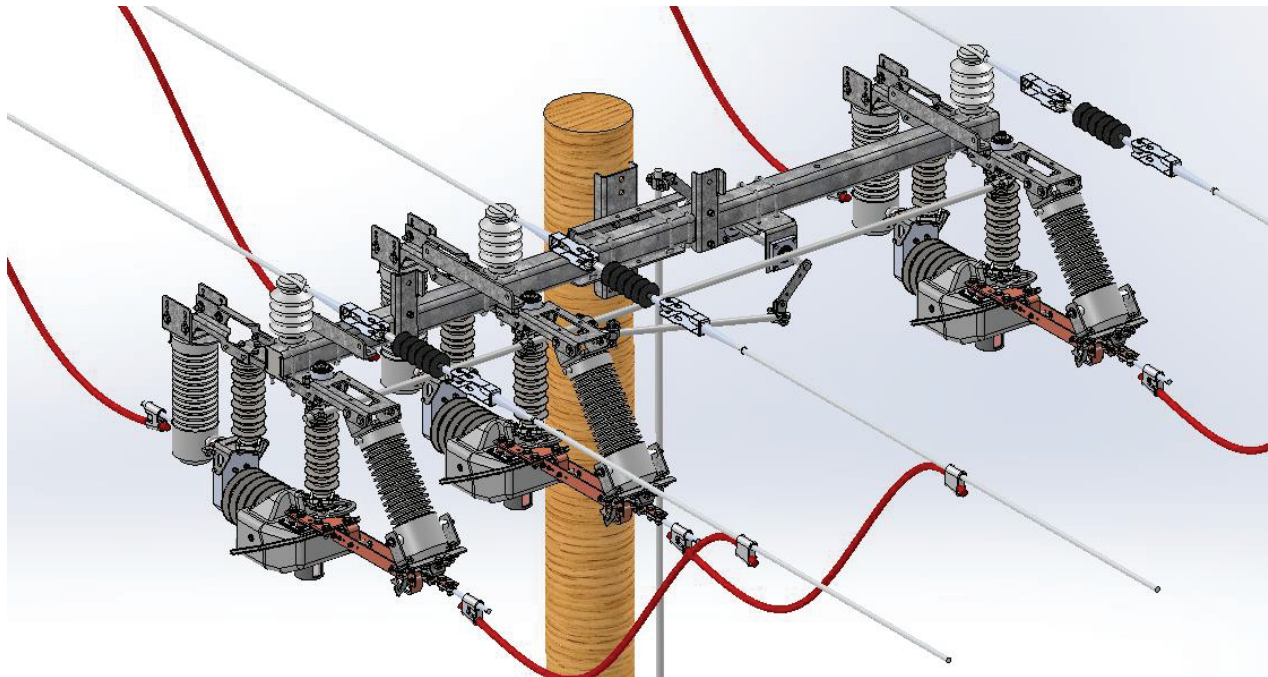

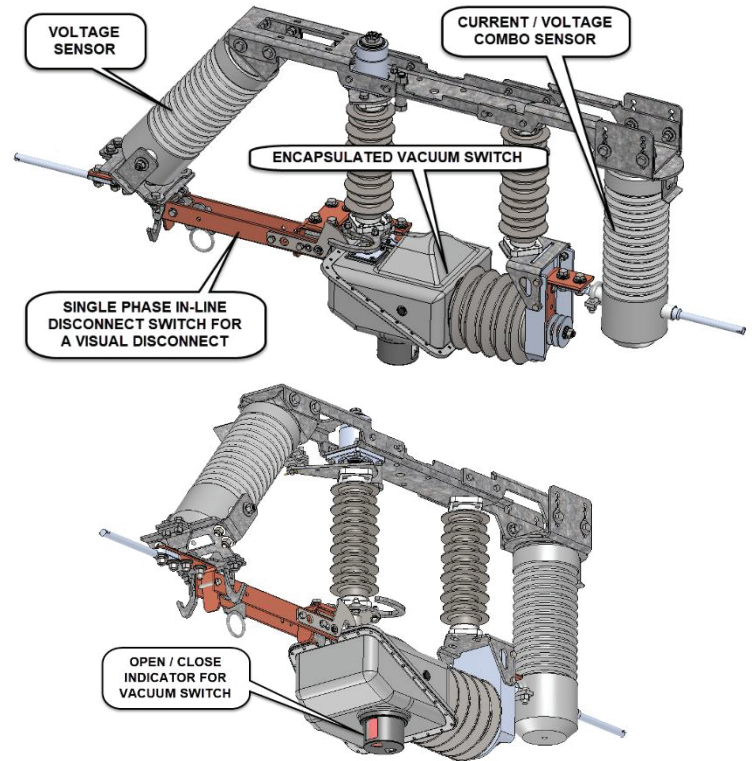

## Gang Operated Vacuum Break Switch

MPS' GOVB is the solution for fire mitigation, wildlife protection and reliability for your grid.

### FEATURES:

- No Arcing – Switch operates open / close inside of a vacuum bottle
- In-line hot-stick operated disconnects are mounted to the switch to provide a visual open
- Interlock mechanism to prevent inadvertent operation of the disconnect and vacuum switch
- GOVB can be used with a traditional manual handle, hookstick, or Motor Switch Operator (MSO)
- Vacuum switch can replace existing sidebreak disconnect contact set allowing for simple retrofits and to reduce cost
